**DETAILED ACTION*****Election/Restrictions***

Claims 4-5 and 8-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species [embodiments, figures 5-12], there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on /04/01/2005.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 6-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-23 of U.S. Patent No. 6,822,547. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both claiming the same .

Saito et al. [US 6,822,547] discloses a current transformer comprising a Rogowski coil with its structure/arrangement [see claims 21-23].

Saito et al. discloses the instant claimed invention except for the specific arrangement of the printed circuit board surfaces and additional of the return circuit line.

Art Unit: 2832

The specific arrangement of the printed circuit board surfaces and additional return circuit line would have been an obvious design consideration based on the intended applications/environments use.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Altman et al. [US 5,055,816] ; Swanberg [US 4,803,425] ; Foster [US 3,668,587] and UK 2,342,783.
